

# CAT-M1 PLUG AND PLAY VEHICLE TRACKING UNIT INSTALLATION GUIDE

# CAT-M1 PLUG AND PLAY VEHICLE TRACKING UNIT INSTALLATION GUIDE

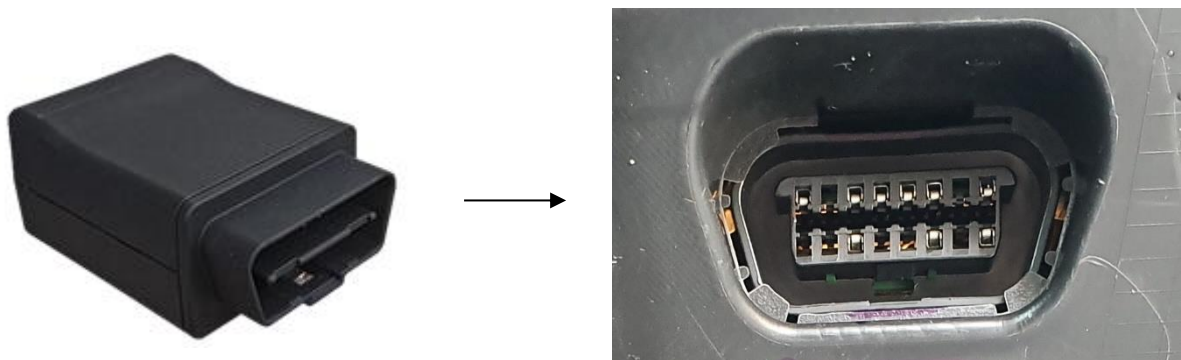

## INSTALLATION OF YOUR TELSTRA EAGLETRACK PLAY AND PLAY DEVICE

Your Telstra EagleTrack device kit includes the OBDII device and a Y split cable.

### INSTALLATION STEPS

The OBDII device is self-installed by plugging the device into the OBD port of your vehicle. Before plugging in the device, ensure that your vehicle engine is off.

For help locating your OBD port, please refer to your owner's manual or see the [Installation page](#) on the EagleTrack website.

The OBDII device is successfully installed and setup for tracking when all three lights are on (green, orange and red).
